ATEX approved

End of Line Flame Arrestor

model number 10

Product Description

StorageTech Model Number 310 flame arrester is a safety device that has a flame barrier with a large number of defined passage gaps, whose gap cross section is set with regard to the properties of the flowing gas, is cooled effectively and secured against a flame flashback in the case of continuous combustion. They also allow free venting in combination with flame protection for vertical vent applications. They are typically mounted to a flange or pipe, which connects the vapor space of a storage tank or a pipeline.

Product Benefits

- StorageTech flame arrester Model 310 provides safety. It blocks the flame and does not allow flame travel through a pipeline or any in out-let.
- Protect s environment .Flame arrester prevents your facility against fire that is caused by explosions.
- Special cap design protects the flame arrester interior material against dust and rain.
